

Helping to improve  
the **survivorship** of  
orthopaedic implants

**Summit Medical  
Pulsed Lavage Product Guide**

# We keep patients moving

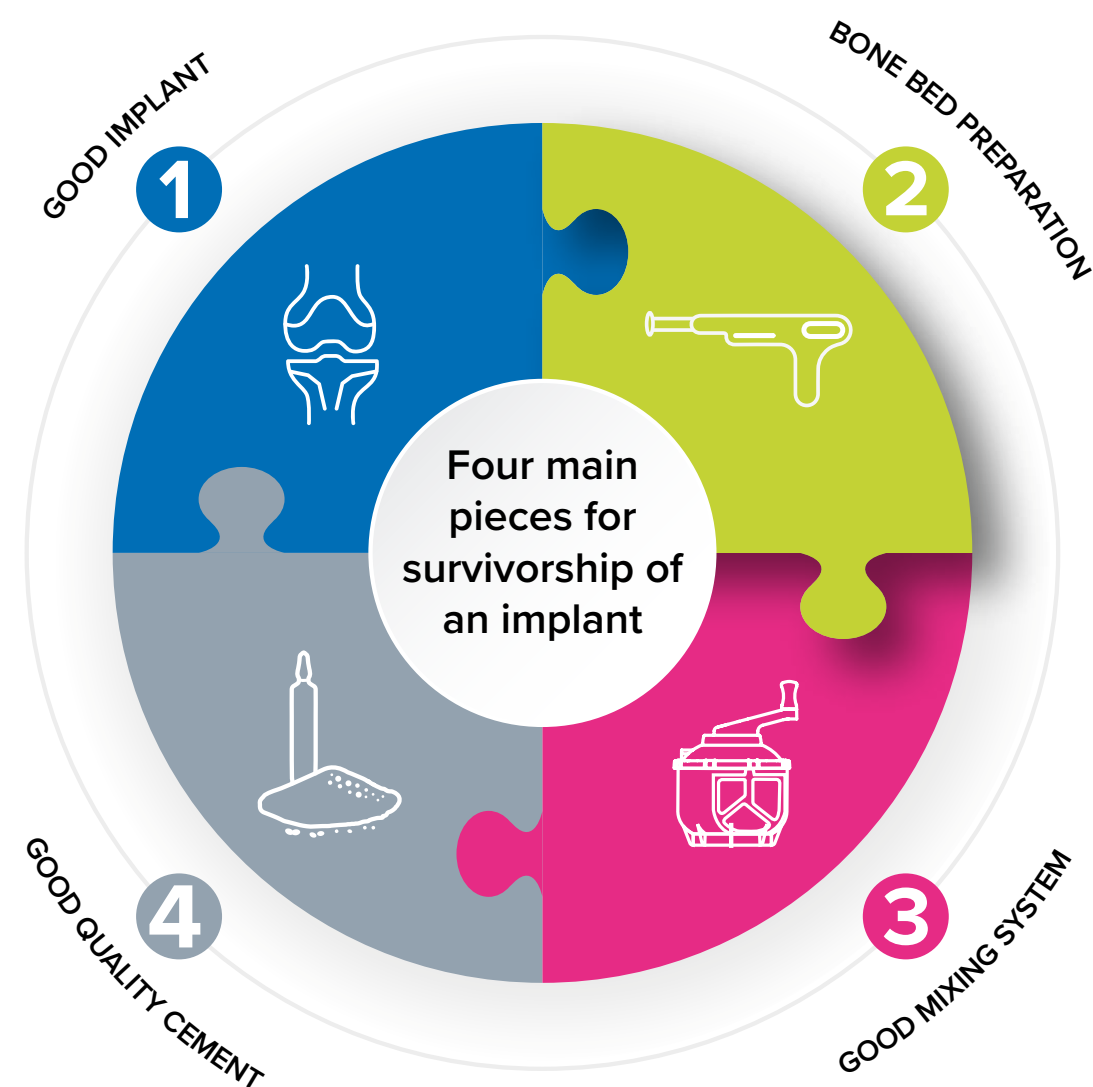

As a trusted orthopaedic surgical partner to the top global orthopaedic leaders, we instil confidence and offer simplicity to healthcare professionals treating complex clinical challenges.

Through decades of research and development, our products are a preferred choice for orthopaedic surgeons globally.

# What is needed for implant survivorship and wound debridement?

Our single-use high pressure Pulsed Lavage system effectively cleans bone and removes debris during total joint procedures, increasing cement penetration into the cancellous bone for potentially stronger implant fixation and reduced revision rates. It is also an effective mechanical debridement system for cleaning wounds, removing dirt, necrotic tissue and debris.
